

The Project

The renovation of Madison Square Garden is an \$850 million project that will transform the forty four year old structure into a state of the art, twenty first century sports and entertainment venue. The project is expected to take approximately forty months to complete with the majority of the work being done during the summer months in order to minimize disruptions during the Basketball and Hockey seasons.

The Systems

ADCO Electrical will utilize its wide ranging industry expertise to ensure a successful implementation of the following systems:

Audio Visual - Distributed Antenna System - Internet Protocol TV - SMATV - Broadcast Cabling - Telecommunications Cabling
