

**OSI Pharmaceuticals**  
Saw Mill River Road  
Ardsley, New York

## Project Description

Our scope of work is to replace the 15KV Con Edison switchgear and install a new 15KV distribution system throughout the 46 acre facility.

2 - boilers @ 50,000 lbs per hour

1 – 400 KW steam turbine generator

2 – 1500 ton chillers

The two boilers supplied steam for heating existing 6 office buildings. The surplus steam is used to run a steam induction electric generator to create power for the facility. The boilers also fed steam to the two 1500 ton chillers to create chilled water for HVAC system throughout facility.
